SIEMENS

INSTALLATION INSTRUCTIONS
Model ENCL-01

Enclosure

INTRODUCTION

The model ENCL-01 Enclosure from Siemens Industry, Inc., is a metal enclosure box for Siemens management solutions.

The ENCL-01 consists of a door and a backbox, as shown in Figure 1.

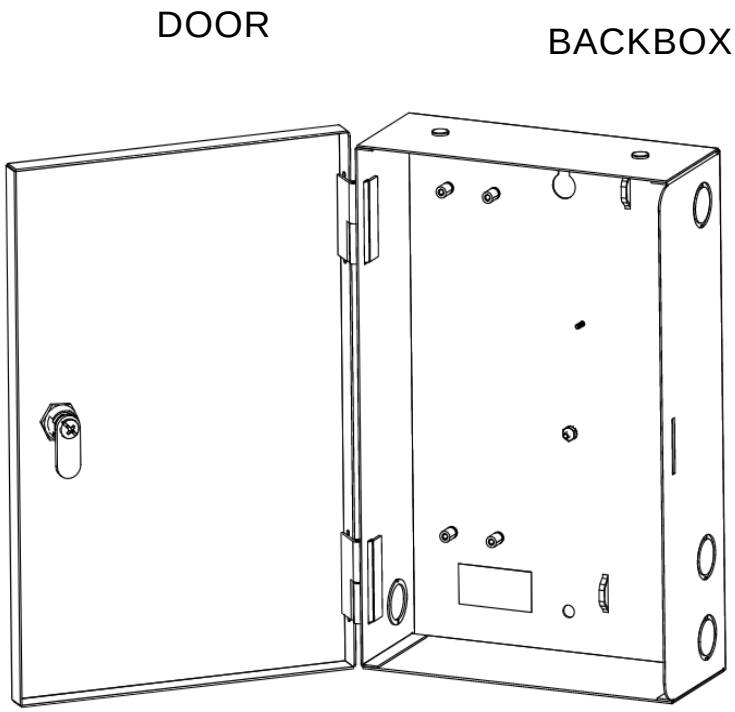

Figure 1
ENCL-01 Enclosure

INSTALLATION INSTRUCTIONS

1. Select a clean, dry, shock and vibration free surface next to the Desigo Fire Safety Modular/Cerberus PRO Modular Fire panels.
2. Mark the location of the upper mounting hole.
3. Drill the hole and screw in the top bolt ¼" in diameter, leaving a small gap between the wall and the bolt.
4. Place the enclosure over the top bolt and allow it to slide down over the bolt.
5. Mark, drill, and install the bottom bolt.
6. Tighten both bolts securely against the back wall of the enclosure.

FOR MOUNTING A CXG3.X200.FIRE TO A ENCL-01 ENCLOSURE -
Refer to CXG3.X200.FIRE installation Instruction, P/N A6V13835465.

SPECIFICATIONS

ENCL-01:

Size: Box: 8.60” W x 3.70” D x 13” H
Door: 8.97” W x 0.63” D x 13.37” H

Weight: Box: 3.6 lbs.

Door: 2 lbs.

Cyber security disclaimer

Siemens provides a portfolio of products, solutions, systems and services that includes security functions that support the secure operation of plants, systems, machines and networks. In the field of Building Technologies, this includes building automation and control, fire safety, security management as well as physical security systems.

In order to protect plants, systems, machines and networks against cyber threats, it is necessary to implement – and continuously maintain – a holistic, state-of-the-art security concept. Siemens' portfolio only forms one element of such a concept. You are responsible for preventing unauthorized access to your plants, systems, machines and networks which should only be connected to an enterprise network or the internet if and to the extent such a connection is necessary and only when appropriate security measures (e.g. firewalls and/or network segmentation) are in place. Additionally, Siemens' guidance on appropriate security measures should be taken into account. For additional information, please contact your Siemens sales representative or visit https://www.siemens.com/global/en/products/automation/topic-areas/industrial-cybersecurity.html

Siemens' portfolio undergoes continuous development to make it more secure. Siemens strongly recommends that updates are applied as soon as they are available and that the latest versions are used. Use of versions that are no longer supported, and failure to apply the latest updates may increase your exposure to cyber threats. Siemens strongly recommends to comply with security advisories on the latest security threats, patches and other related measures, published, among others, under https://www.siemens.com/cert/en/cert-security-advisories.htm
